Company Overview

Excellence in Measurement Technology provides process improvement consultation services in cybersecurity and other frameworks for many organizations in the DIB. Since 2000, our company has provided training and consulting to help organizations implement process improvement initiatives with measureable results. We use our expertise in multiple process improvement methodologies to apply the right methods and best practices to help your organization achieve its strategic goals.

Core Competencies:

- CMMC (Cybersecurity Maturity Model Certification) consulting
- CMMI (Capability Maturity Model Integration) appraisals and training
- Agile training and consulting for Scrum and Kanban methods
- Scaled Agile Framework® (SAFe®) consulting and SAFe® Agilist and SAFe® Practitioner training and certification
- ISO Registrar, internal audits and audit prep for ISO 9000, 13485, 20000, 27000, and AS9100-D
- Six Sigma and Lean manufacturing training and consulting
- Multi-model process improvement integration and implementation

Differentiators:

- Cost-effective process improvement
- Serve organizations of all sizes, industries, and locations
- Help organizations define and realize quantitative strategic business objectives and goals
- Expertise in integrating multiple process improvement methodologies
- 23 years of business
